2.3.1: Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences using ICT tools

JNS Govt. PG College has always been trying to cope with the latest methodologies in teaching pedagogy. The focus is on methodologies that enhance the interest of students in the core academic values of the subject with the applicatory part.

Undergraduate & Postgraduate Classes:

Experiential learning through projects is already a part of the curricula of all P.G Programmes, and in the new education policy, it is also incorporated in all U.G. Programmes. Students are allotted projects, and they must work for stipulated hours on the project and submit a project report. On campus, projects are monitored and completion certificates are provided by the concerned faculties whereas off-campus projects are certified by the host organization. In other courses of UG, experiential learning is in the form of projects as part of the syllabi.

Participative Learning

Every programme has its own study groups and study circles to promote participative learning. **Whatsapp study groups, Google classroom, Groupmails, Mindmapping, etc.** are used to involve students in a learning exercise. The College library has enough space for students where they can share interdisciplinary study materials among themselves. Students are also involved in finding out answers to problems related to their syllabi, which have an applicatory part too like gender issues, energy and environmental issues, legal issues, and all types of contemporary issues.

Problem Solving:

Some of the problem-solving approaches used by the institution are:

1. Compulsory projects at the PG final semester and all programmes at the UG level in the NEP 2020.
2. Seminars and Tutorials
3. Assignments
4. Lectures thorough industry experts
5. Field Trips
6. Industrial visits
7. Classroom/Departmental workshops in PG departments.

The college has moderate infrastructure available for ICT in the form of a smart classroom, virtual classrooms, and classrooms equipped with devices like multimedia Projectors, and Wi-Fi connectivity through high-speed internet connections. The college has always been striving hard to augment its ICT infrastructure to cope with the latest technology as well as the ever-increasing student strength. The college has gradually incorporated ICT tools in the teaching-learning process. The teaching faculties of the college make optimum use of the ICT tools in the institution for an effective teaching-learning process.

In recent years there has been a paradigm shift in the teaching-learning process in higher educational institutions owing to various reasons. Rather than innovations, it has become a compulsion to use the available technological platforms for teaching-learning. Teachers now use Google classroom, Google Meet, WhatsApp groups, **and** email as teaching-learning platforms. Many faculties use powerpoint presentations for interactive teaching experiences. The department of higher education has launched an open platform for online learning of students on which a lot of e-contents are available in all subjects. The teachers continuously train and encourage the students to learn through these platforms.

Peer academic activities are also carried out through the use of ICT. The college also uses ICT for evaluation support through the generation of quizzes in Google forms and Google docs. Academic activities are shared, and participative learning is practiced through Google docs, Google sheets, and Google slides.

रस

साहित्य अथवा काव्य की आत्मा रस है
इसीलिए संस्कृत के आचार्य विश्वनाथ ने कहा है -
वाक्यम रसात्मकम काव्यम
अर्थात् सरस अभिव्यक्ति काव्य है।

रस का स्वरूप

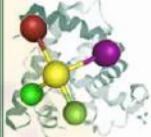

साहित्य या काव्य रस लौकिक रसों से अलग है ।
 अलौकिक रसों की भौतिक सत्ता होती है ।
 यह सूक्ष्म अतीन्द्रिय है।
 यह ना तो पूर्णतया लौकिक है ना अलौकिक ।
 रस भाव से उत्पन्न आनंद है।
 यह भावात्मक है।

An Introduction of “Groups”

Prepared By:
Dr. Sunil Kumar Mittal
Assistant Professor (Mathematics)
JNS Govt. PG College, Shujalpur

Learning Outcome

After completing this topic students will be able to

1. Understand the concept of sets, binary operations, and algebraic structures.
2. Understand some properties of binary operation
3. Understand the concept of Groups
4. Understand some properties and example, non-example of Groups.

Set:- A collection of '**well defined**' elements is called set.

↓
No Confusion about
inclusion and exclusion of
element

Example:

$$\mathbb{N} = \{1, 2, 3 \dots\}$$

$$\mathbb{Z} = \{\dots - 3, -2, -1, 0, 1, 2, 3 \dots\}$$

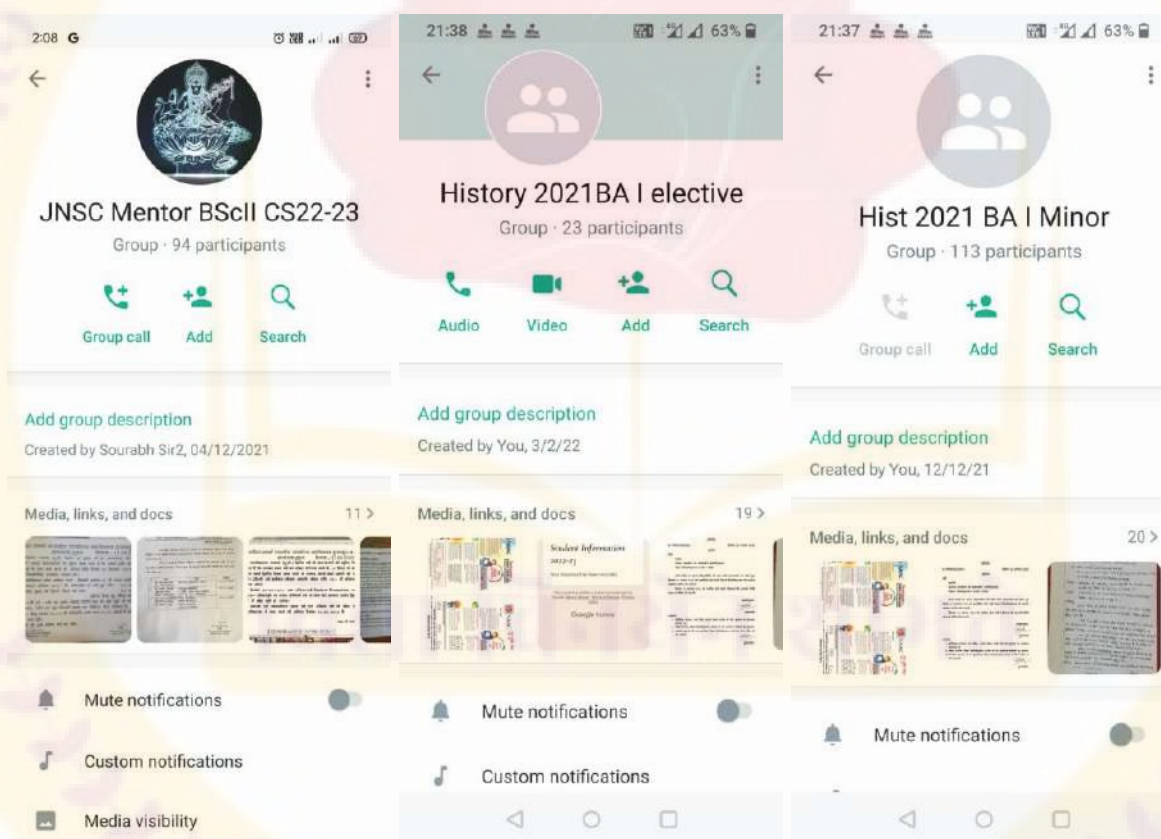

$$\mathbb{R} = (-\infty, \infty)$$

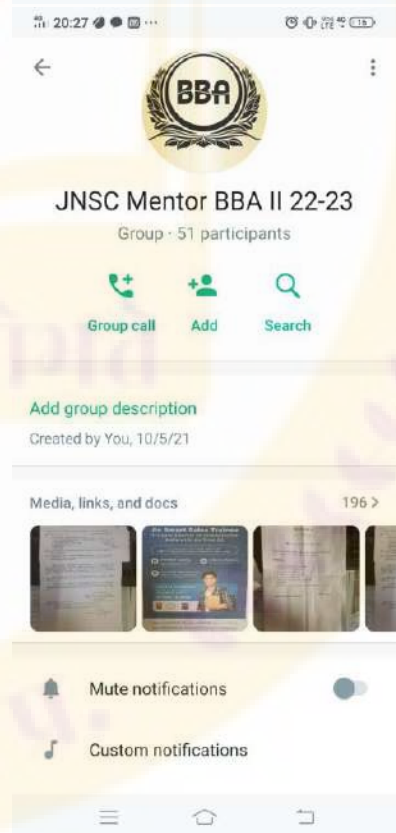

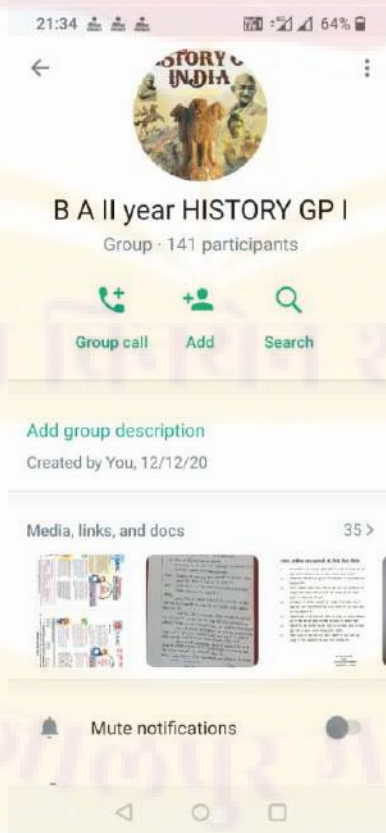

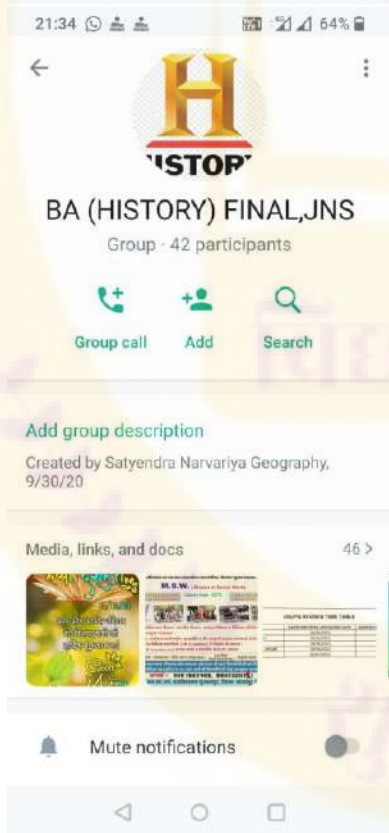

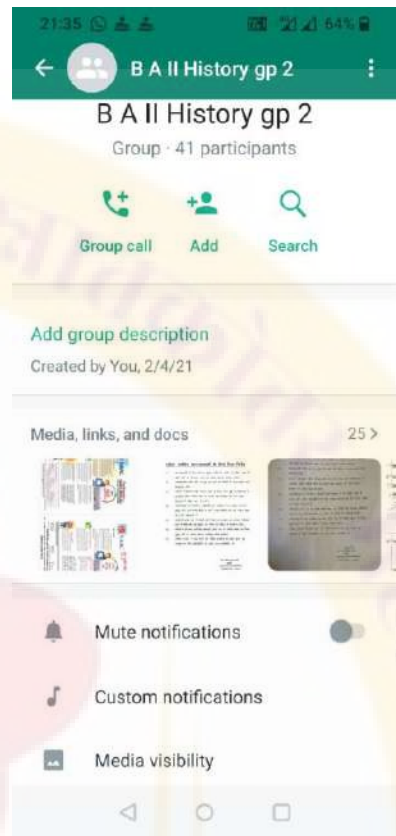

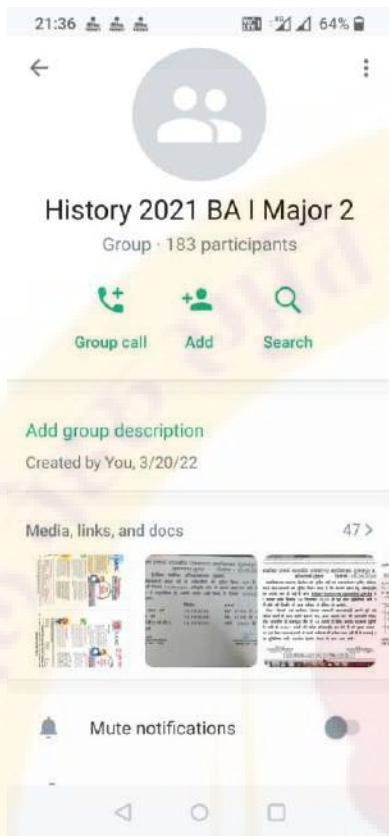

Non Example:

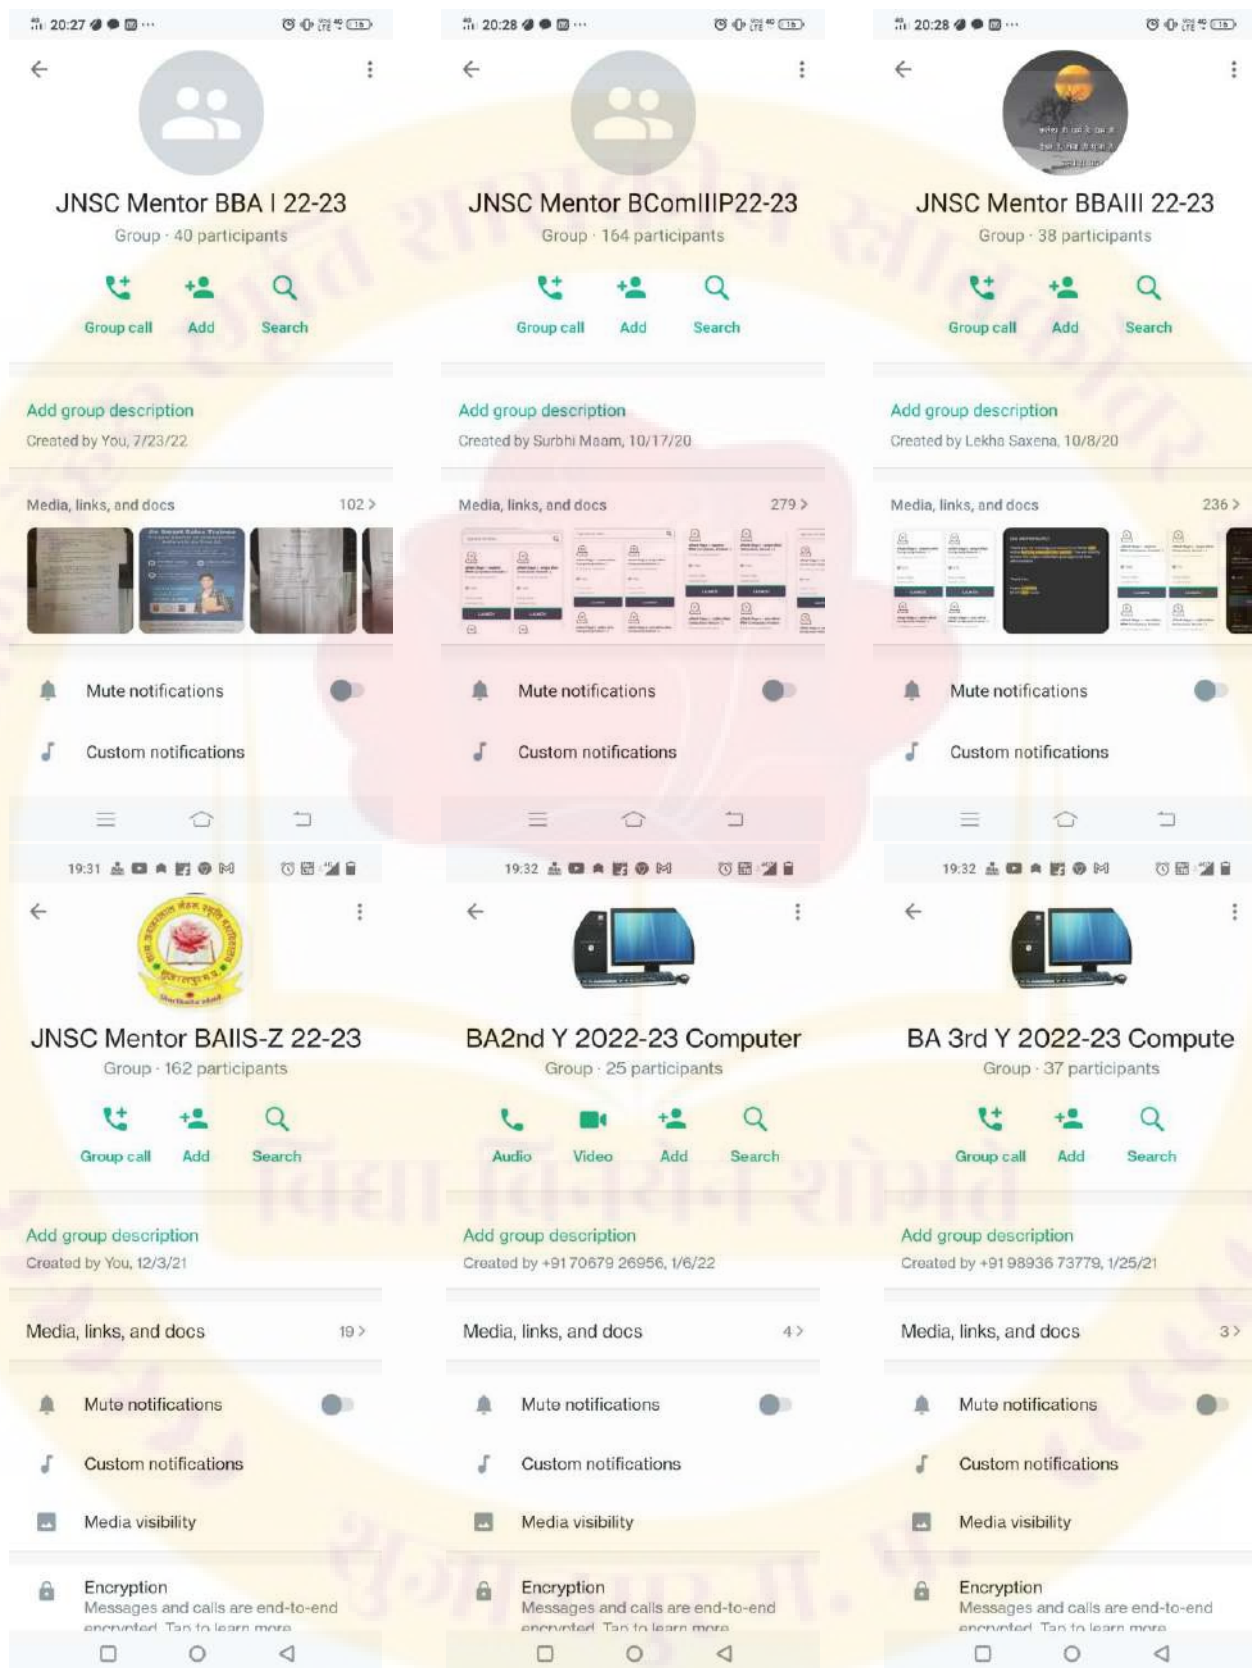

Set of all sets that does not contain itself
is not a set

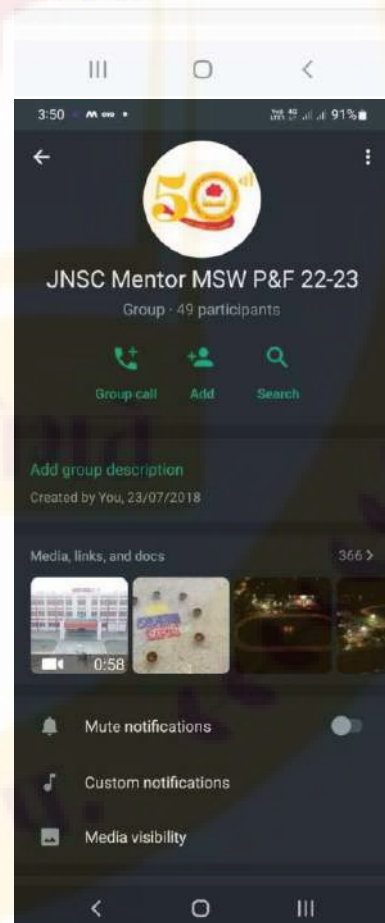

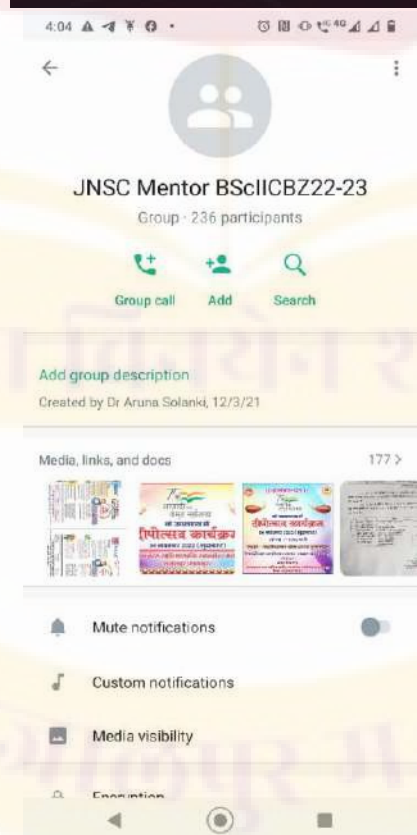

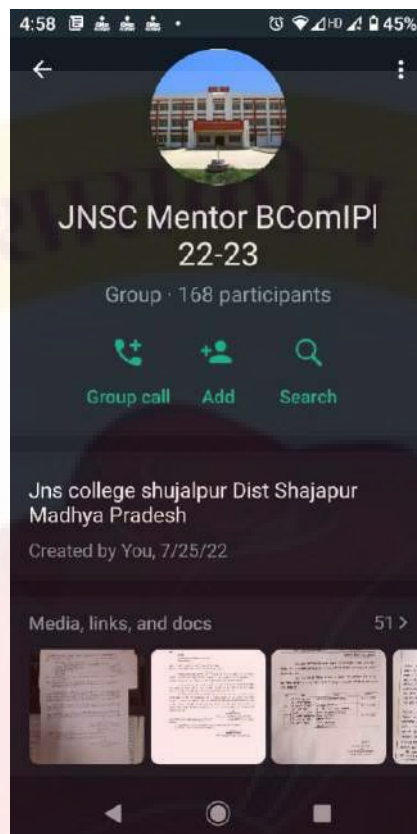

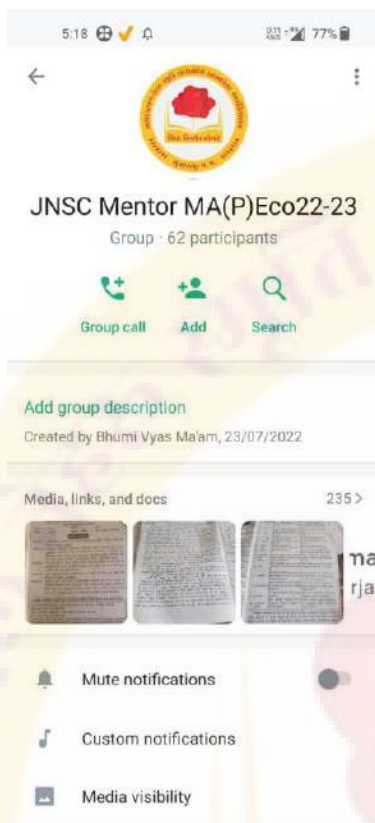

5. WHATSAPP GROUPS

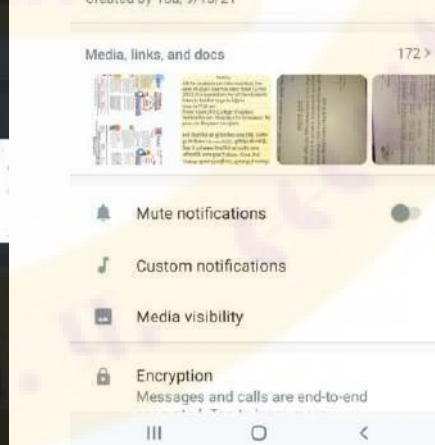

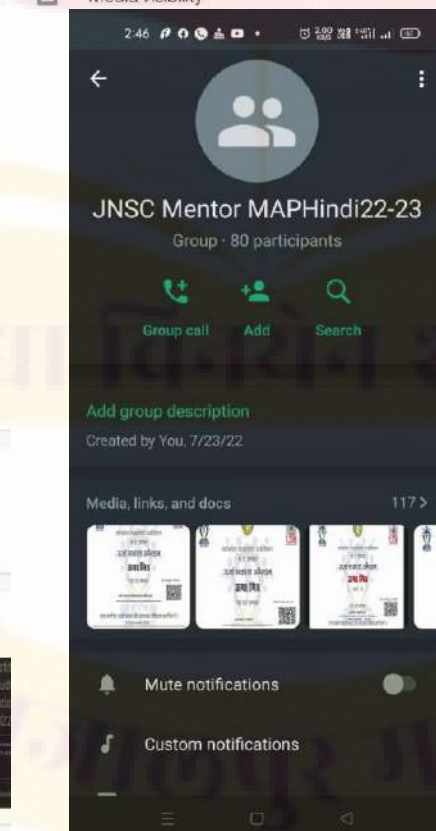

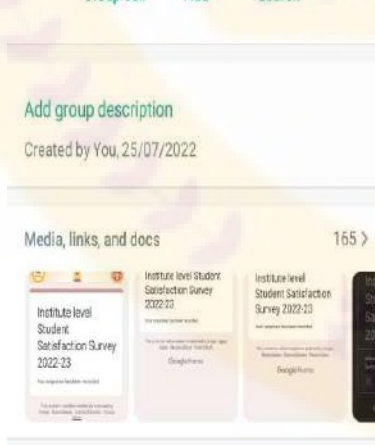

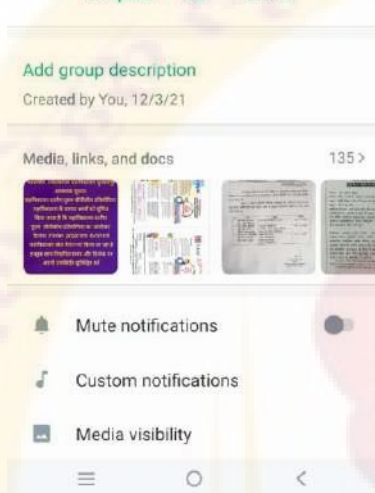

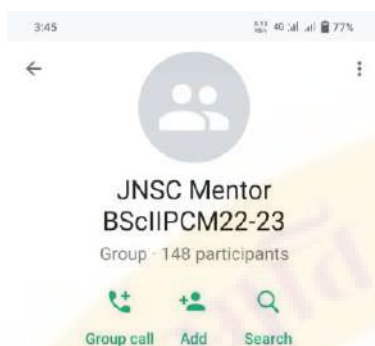

Our institution follows the mentor mentee system. Therefore, it is compulsory for each mentor to create a WhatsApp group for their respective mentees to maintain seamless communication. Students ask their queries through these WhatsApp groups and teachers resolve them as per their requirements.
